### THREE MISSIONS FOR DEVELOPMENT IN THE MEDITERRANEAN

To meet the needs of Mediterranean States and their agricultural and rural sectors, CIHEAM-IAMM is engaged in three synergistic activities **Research – Education – Cooperation**. Its **networking capacity** allows CIHEAM-IAMM to mobilize the expertise of multiple stakeholders (decision-makers, professionals, teachers, researchers, civil society) and to propose alternatives for **sustainable rural development**, at the crossroads of science, innovation and diplomacy.

### UNITED FOR THE FUTURE OF THE MEDITERRANEAN

Created in 1962, the International Center for Advanced Mediterranean Agronomic Studies (CIHEAM) is an **intergovernmental organization** which gathers **13 States**. CIHEAM, including its **4 institutes and headquarters**, brings the topics of agriculture, food and rural territories to the global debate on the Mediterranean. Biennial **ministerial meetings** provide opportunities for regular high-level discussions on these core development issues.
